Commissioner-cum-Secretary to Government
School & Mass Education Department, Odisha

MESSAGE

It is certainly a privilege to carry out an objective by providing effective & quality education through Information Communication Technology and venture for fulfilling the dream of lakhs of students in our State. Our Project "e-Vidyalaya" is being implemented in the State to improve the teaching and learning mechanism in the Government and Government aided High Schools by using modern age technology in Schools by the students and teachers as well.

The project includes setting up of an ICT enabled interactive teaching environment based Labs by using high end IT infrastructure, subject based multimedia content, training and capacity building of teachers.

The role of teachers is really vital for smooth management of such ICT labs already set up in the Schools. I am glad to say that OKCL is publishing a booklet under the project for use by the Schools. I hope this booklet will be a roadmap for usage of ICT lab and parameter for use of ICT labs through active involvement of all teachers for success of the mission as enshrined in e-Vidyalaya project.

I convey my best wishes for the success of the mission and wish the publication of the booklet. I also look forward to get good response from all Headmasters to give maximum effort for involvement of all subject teachers to use the ICT labs to teach the students. Their involvement will also be evaluated time and again by this department for accomplishment of the goal of the project.

(USHA PADHEE)
